Yup, it was. Just checking whether you were planning on commenting "no".

Thanks

I don't see why not as long as it was collected in a consistent manner with the FSP.

Inclusion of

City composite data

at OF53

Kristine,
We had proposed that the LWG include the City's
stormwater composite data in
the dataset use to calculate loading - this was
suggested in the last
check-in with the Tech Team. Are you in support of
this inclusion?
